SUMMARY

Java Backend Engineer with 2+ years building scalable microservices and event-driven systems in the financial sector. Reduced a 2-week fiscal data workflow to 40 minutes via a 400GB+ Spring Batch ETL pipeline and automated 97% of manual audit processes across 20+ departments using an async AWS architecture (SQS, Lambda, ECS Fargate, SNS, S3). Founder of RetrospectiveAI, a RAG-based enterprise knowledge platform with enterprise interest from Dell and DBServer. Stack: Java 21, Kotlin, Spring Boot 3.5+, MongoDB, PostgreSQL, Redis, Kafka, RabbitMQ, AWS, Docker, Kubernetes, CI/CD. English B2 (Cambridge). Agile, fast-paced environments.

TECHNICAL SKILLS

Backend: Java 8–21, Kotlin, Spring Boot 3.5+, Spring Security, Spring MVC, Spring Data JPA/Hibernate, RESTful APIs, Design Patterns

Messaging & Async: Apache Kafka, RabbitMQ, AWS SQS, AWS SNS, Redis, Event-driven Architecture, Microservices

Testing & Quality: JUnit 5, Mockito, Integration Testing, Clean Code, SOLID

Cloud & DevOps: AWS (ECS, EBS, Lambda, SQS, SNS, S3, Fargate, EventBridge), GCP, Azure, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, MongoDB (relational & non-relational)

Architecture: Hexagonal Architecture (Ports & Adapters), Microservices, Event-driven, Swagger/OpenAPI, REST API Design

Observability: Prometheus, Grafana, alerting, SRE practices

Methodology: Agile/Scrum, Waterfall, Git, GitHub, GitFlow

Languages: Portuguese (native), English (B2 Cambridge Certificate)

PROFESSIONAL EXPERIENCE

AFL Consultores Associados

Feb 2026 – Present

Java Backend Engineer

São Leopoldo, Brazil · Hybrid

- Built Java 21 + DuckDB ETL pipeline (Spring Batch) mirroring 400GB+ of fiscal report data into PostgreSQL in under 40 minutes, replacing a workflow that previously took 2 weeks.
- Designed async fiscal audit pipeline (SQS, SNS, Lambda, ECS Fargate): Fargate tasks download S3 files, process into Parquet, compare against reference data and generate XLSX reports via Apache POI reducing manual audit work 97% across 20+ departments.
- Rebuilt legacy financial system from scratch using Hexagonal Architecture (Java 21, Kotlin, Spring Boot 3.5, Swagger/OpenAPI, PostgreSQL schema-per-tenant, MongoDB Atlas, AWS ECS, Terraform + OIDC CI/CD) covering accounts payable/receivable, bank reconciliation and financial reporting for 20+ internal departments.
- Enhanced company AI chatbot: resolved critical bugs, delivered demo user onboarding flows — improving platform stability, user experience and customer acquisition.

Portosys

Oct 2025 – Jan 2026

Java Backend Developer

Porto Alegre, Brazil · On-site

- Built a Java-to-Marble interpreter using the Java Reflection API, enabling developers to write standard Java that executes natively within the proprietary framework, eliminating the need to write Marble syntax directly and reducing onboarding friction.
- Led Java version migration to Java 18+, resolving deprecated APIs and dependency conflicts while preserving backward compatibility across production application modules.

Freelance & Personal Projects

Apr 2024 – Present

Java Backend Engineer

Remote

- RetrospectiveAI (retrospectiveai.alcaria.dev) — Founded AI platform that transforms scattered business knowledge into real-time queryable intelligence using RAG + GPT-4 via OpenRouter. Stack: Spring Boot, Go, Python, TypeScript, React. Enterprise interest from Dell and DBServer, both evaluating internal deployment.
- Arise — Self-hosted deployment automation platform on Hexagonal Architecture (Ports & Adapters): async pipelines via RabbitMQ decouple HTTP from execution, Redis handles JWT caching, SSE streams real-time logs, Swagger/OpenAPI docs. Stack: Java 21, Kotlin, Spring Boot 3, PostgreSQL, Docker, Kubernetes, nginx.

EDUCATION

PUCRS – Pontifical Catholic University of Rio Grande do Sul

Feb 2025 – Feb 2028

Bachelor of Science in Software Engineering (STEM)

Porto Alegre, Brazil
